

Handicraft Instructions for Cardboard Pentominoes

Preliminary

be needed:

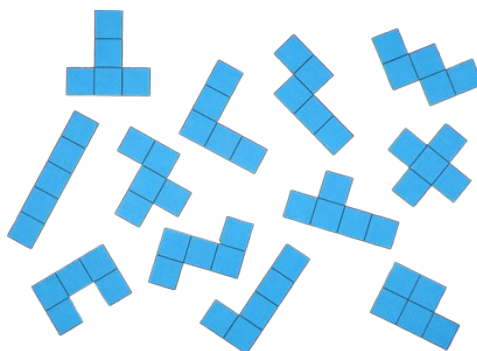

1. A pair of scissors
2. A glue stick
3. A piece of cardboard.

4. Paper templates for the pentominoes.

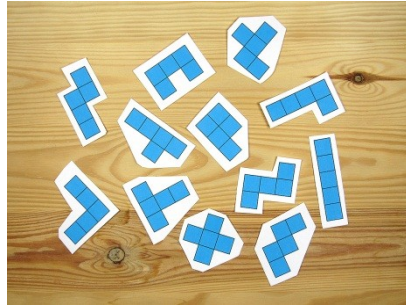

To 4: There are paper templates available for download in different colors on the download page of www.pentoma.de/en/. Pentominos are used on both sides when playing. Each template therefore consists of 2 sets of Pentominoes, one for the front and one for the back.

You can also download this handicraft manual and many figures that can be laid out with the handcrafted pentominos from www.pentoma.de .

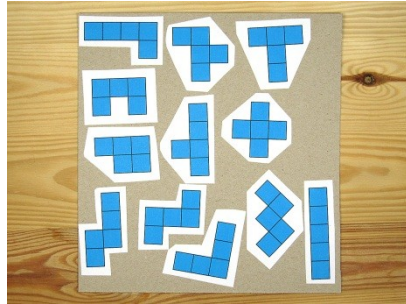

Procedure

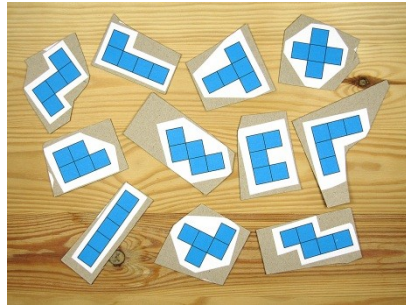

1. Cut out one set of printed paper pentominoes. A 1 to 2 centimetre wide margin can be left standing.

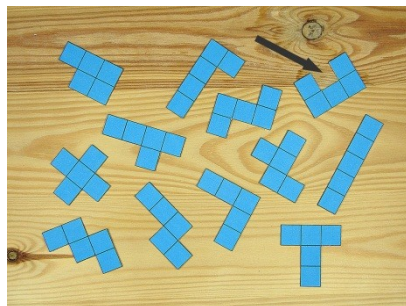

2. The 12 paper pentominoes are glued onto the cardboard.

3. The glued pentominoes are cut out, again with margin.

4. Next, the pentominoes are cut out exactly. In the gap of the U-pentomino other pentominoes jam slightly. Therefore you should cut out the gap a little bigger and try to see if the other pentominoes fit into it.

5. Finally, the paper pentominoes of the 2nd template sheet are cut out exactly and glued to the back of the cardboard pentominoes.
