

Bastelanleitung für Papp-Tetrabolos

Vorbereitung

Benötigt werden:

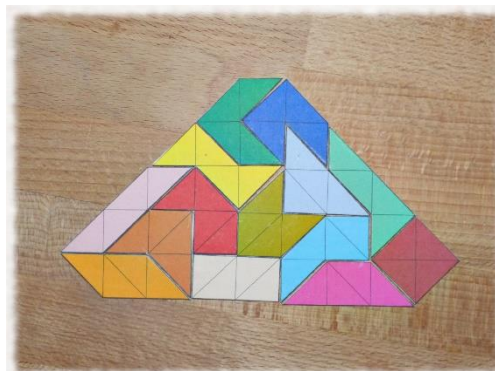

1. Eine Schere
2. Ein Klebestift
3. Ein ca. DIN A4 großes Stück Pappe, z.B. die Rückseite eines DIN A3 Zeichenblockes.
4. Papier-Vorlagen für die Tetrabolo-Steine.

Zu 3.: Die übliche Pappstärke der DIN A3 Zeichenblöcke beträgt 1 mm. Diese Pappen sind sehr gut geeignet. Die Pappen sind einigermaßen formstabil und lassen sich noch mit einer Schere schneiden.

Zu 4.: Papier-Vorlagen habe ich auf der Download-Seite von www.pentoma.de in verschiedenen Farben zum Herunterladen bereitgestellt. Tetrabolos werden beim Spielen beidseitig benutzt. Jede Vorlage besteht deshalb aus 2 Sätzen Tetrabolos, je einem Satz für Vorder- bzw. Rückseite.

Diese Bastelanleitung und viele Figuren, die sich mit den gebastelten Tetrabolos auslegen lassen, können Sie ebenfalls auf www.pentoma.de herunterladen.

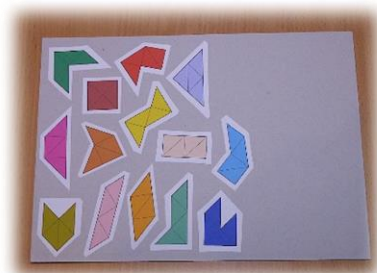

Vorgehensweise

1. Einen Satz der ausgedruckten Papier-Tetabolos ausschneiden. Dabei kann ruhig ein 1 – 2 cm breiter Rand stehen bleiben.

-
2. Die 14 Papier-Tetabolos werden auf die Pappe geklebt.

-
3. Die aufgeklebten Tetabolos werden ausgeschnitten, wieder mit Rand.

-
4. Als nächstes werden die Papp-Tetabolos genau ausgeschnitten.

-
5. Als letztes schneidet man noch die Papier-Tetabolos des 2. Vorlagen-Blattes genau aus und klebt sie auf die Rückseite der Papp-Tetabolos.
